DELIVERING BENEFITS TO SMALL OFFICE / HOME OFFICE

LOWER COST

Lower costs

RIP & Replace

PROBLEM

Migrating from one anti-malware vendor to another demands a lot of time, effort and IT resources – it's easier not to switch.

SOLUTION

RIP & Replace. ESET Endpoint solutions now uninstall all redundant anti-malware software during their installation, and endpoints are deployed pre-set up.

BENEFIT

Migration to ESET is seamless, and requires minimal time and resources.

Lower costs

ESET License Administrator

PROBLEM

Our IT budget is constantly scrutinized, and costs need to be attributed accurately. But it's difficult to keep track of how many licenses we are using or if we are paying for too many.

SOLUTION

ESET License Administrator. Our new licensing administrator handles all licenses transparently, in one place – from where you can merge, delegate and manage them centrally, in real-time.

BENEFIT

You get the most out of your licenses, with no seat wasted. Your IT department can plan and manage resources better.

Lower costs

Built-in Data Access Protection

PROBLEM

We need to manage online and offline data access but dedicated tools are expensive, need additional management, and increase endpoint hardware demands.

SOLUTION

Built-in Data Access Protection. ESET Endpoint Security comes with built-in Anti-Phishing, Device Control, Web Control, Firewall and other functionalities to cover these security demands.

BENEFIT

No need to pay for and maintain dedicated tools, or upgrade your hardware to cope with them.

Lower costs

Automation by Agent

PROBLEM

We spend a lot of time on repetitive day-to-day tasks. And our mobile workforce isn't always connected to the corporate network - so how can we control security?

SOLUTION

Automation by Agent: All tasks are run by an independent agent directly on the endpoint, even without connectivity to ESET Remote Administrator. Results (logs) are then synchronized upon connection.

BENEFIT

IT administrators' day-to-day tasks are minimized, saving time and allowing them to focus on more important or sophisticated tasks.

OUTSTANDING USABILITY

Outstanding usability

RIP & Replace

PROBLEM

Migrating from one anti-malware vendor to another demands a lot of time, effort and IT resource – it's easier not to switch.

SOLUTION

RIP & Replace: ESET Endpoint solutions now uninstall all redundant anti-malware software during their installation, and endpoints are deployed pre-set up.

BENEFIT

Migration to ESET is seamless – RIP & Replace makes the process easy.

Outstanding usability

Low System Demands

PROBLEM

IT security solutions slow down our computers and our people too, leading to complaints from users.

SOLUTION

ESET is famous for its low demands on systems. All our products are optimized to ensure high-speed running, as confirmed by independent testing.

BENEFIT

Your computers don't run slower – and nor do your people. The result: no more user complaints.

Outstanding usability

ESET License Administrator

PROBLEM

It's difficult to manage licenses dynamically in response to changes in our network. Our IT budget is constantly scrutinized and we need a way to demonstrate spending on licenses is effective.

SOLUTION

ESET License Administrator. Our new licensing administrator handles all licenses transparently, in one place – from where you can merge, delegate and manage them centrally, in real-time.

BENEFIT

License handling made easy – manage your licenses centrally, in real-time.
