ESET® CONNECT

Easily integrate all ESET APIs into your environment

ESET Connect is a digital security API gateway—a powerful tool for network administrators and SECOPS engineers that allows for increased automation, improved visibility, integration with existing tools, customization, and centralized management of cybersecurity tasks.

As an IT professional, you'll find ESET Connect incredibly useful as integration middleware. ESET APIs for any component or capability of the ESET PROTECT Platform use the exact same logic. This opens up all possibilities without the need for extensive learning.

Currently available APIs

We're releasing APIs in an agile way, as they appear on our roadmap. At the moment, the following types are available:

ESET PROTECT

Endpoint control and management

✓ Get lists of devices based on criteria

✓ Get endpoints and groups

✓ Get lists of events and detections

✓ Response: isolate device, run local scan, shutdown, restart

✓ APIs for policies, installers and tasks

ESET Inspect

The Platform's XDR-enabling component

✓ Detections with a wide range of values

✓ Response actions, including block/unblock/kill/reconnect

✓ List/create/edit (etc.) incident response and threat hunting rules

✓ Operations with exclusions

Progress. Protected.

DATASHEET

Benefits

✓ **Learn one, know all:** Not only can you learn ESET APIs within minutes, but once you know how to work with one, you know how to work with them all.

✓ **Integration:** Integrate with existing systems and applications such as ticketing systems, log management tools, and SIEM & SOAR solutions.

✓ **Improved efficiency:** Streamline digital security workflows and enhance the efficiency of security operations.

✓ **Reduced risk of human error:** Automate security-related tasks and reduce the risk of human error.

✓ **Automation of responses:** Automate security-related tasks across multiple solutions and platforms.

✓ **Tap into the power of the ESET PROTECT Platform:** With ESET Connect, you'll harness the power of award-winning technology, based on 30+ years of innovation across 10 Research & Development centers worldwide.

ESET Connect features

ENHANCED SECURITY

ESET Connect provides an authentication layer so that only authenticated users can access a backend API and are authorized to use its functions, data and operations.

SIMPLIFIED SERVICE DELIVERY

ESET Connect enables the combination of API calls to request services, reducing the traffic volume and streamlining API processes to improve user experience.

PLATFORM AGNOSTIC HTTP DELIVERY

Using HTTPS as a delivery mechanism, you can integrate the APIs into your application, regardless of the platform or language used.

API MONITORING AND LOGGING

ESET Connect provides monitoring for all APIs and tracks requests and response times. It provides unified logging for all APIs so that end-to-end debugging can be performed in urgent cases.

SUPPORT FOR SWAGGER

Speed up the onboarding of any new APIs because, as a rule, each new API we release is documented via Swagger.
