my **eset** ®

ENJOY SAFER TECHNOLOGY™

myESET is a web portal and mobile app for Android and iOS that provides comprehensive oversight of ESET products, licenses and services on your devices while also making it accessible whenever you need it, wherever you go. Get important security and license notifications, and check the security status of protected devices anytime. Install protection for new devices without typing your license key or login. Upgrade and renew your licenses. Add, manage and share licenses with family and friends. Manage ESET Anti-Theft, ESET Parental Control and ESET Password Manager via myESET portal. All that and more is now available to you in one place, at any time.

Award-winning protection

Independent evaluators put ESET among the best in the industry, shown also by the record number of *Virus Bulletin's VB100 awards.*

Legendary antivirus technology

Multi-layered security protects you against all types of online and offline threats and prevents malware spreading to other users.

Made in the European Union

ESET values, like integrity, reliability and independence, all stem from our European roots and are safeguarded by our private ownership structure.

Increased visibility and control over your security

Get detailed information about the security of all the devices connected to your account. Check and manage the status of your licenses. Monitor online activity and control the screen time of your children. Track and find a missing device.

Devices	Check the security status of protected devices at all times. Download and install protection for new devices and instantly secure them against threats
Anti-Theft	Mark a device as missing to track its location, and it will automatically start taking photos and screenshots.
Parental Control for Android	Monitor your kids' online activity, locate them if necessary, define the content they can see, or set up a time limit for web browsing and gaming
Account settings	Change email address, password, country, language or time zone. Turn on/off notifications about special offers or product information
Reporting of issues	Report an issue or bug and send your feedback about the portal or app

Access to information anywhere

Android and iOS mobile apps allow you to have your devices' security under control at all times. Get information about your security status or license validity changes wherever you are.

Notifications	Device, license and account notifications are part of both portal and mobile apps. In addition to security and license information, available actions are detailed
What's New	Updates and introductions of new features within myESET

Easy access to ESET products

Easily share licenses with your family and friends. Download ESET protection designed specifically for the operating system on your new device. Automatically activate new protection for Windows without typing your login or license key. If you're a user of our premium product, manage your saved passwords and generate new ones through ESET Password Manager.

Licenses	Add, manage and share licenses with family and friends. Upgrade and renew when necessary, and control at all times who else can use your license
Password Manager	With the ESET premium license, assign available password stores to any email address – your own or somebody else's. Remove any password store or move it to another premium license, if you have it
