Stellar Cyber and ESET

Endpoint security with AI-driven
SecOps to simplify security operations

STELLAR CYBER®

Today's lean security teams need products that minimize manual processes while keeping their environments safe. ESET and Stellar Cyber are dedicated to delivering products with intelligent automation that complement human expertise, helping security teams to be as productive and effective as possible.

Working towards this common goal, Stellar Cyber and ESET now offer organizations the ability to easily integrate these two market-leading products, driving significant improvements in security posture visibility, threat detection, and analyst productivity.

- **Advanced threat defense:** Protect against ransomware and new, never-before-seen threats with adaptive scanning, machine learning, cloud sandboxing, and in-depth behavioral analysis.

- **Protection of business data:** Comply with data regulations thanks to full disk encryption capabilities on Windows and macOS.

- **Ease of management:** Benefit from single-pane-of-glass remote management for visibility of threats, users, and quarantined items.

ESET BENEFITS

- Leverage a multilayered approach and utilize multiple technologies to constantly balance performance, detection, and response, as well as minimize false positives.

- Experience proactive cloud-based threat defense against targeted attacks and new, never-before-seen threats—especially ransomware.
- Consolidate security alerts, IT and OT logs, network traffic, user activity, and other data into the platform using pre-built integrations.

- Eliminate the need to create and maintain a library of custom detection rules.

- Move from alert-based to case-driven investigations, where related alerts and events are automatically correlated and combined into a single case. This will dramatically improve productivity and efficiency across your security team.

- Drive consistent response actions via pre-defined playbooks.
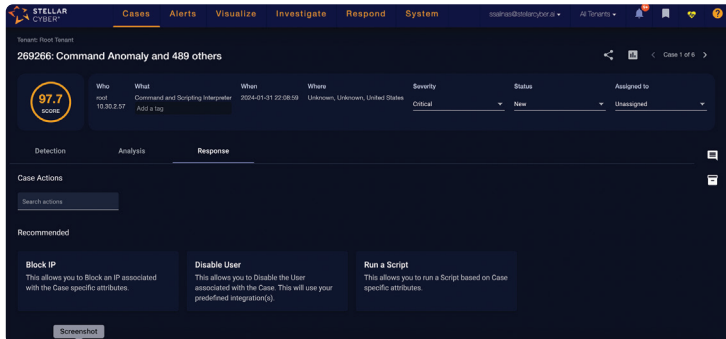

STELLAR CYBER BENEFITS

- Optimize existing security teams.

- Speed security analyst ramp-up time.

- Prevent security incidents, making security a growth enabler.

- Eliminate blind spots across your environment.

- Reduce both mean-time-to-detection and mean-time-to-response.

SOLUTION BRIEF

HOW ESET AND STELLAR CYBER WORK TOGETHER

ESET continuously analyzes endpoint activity to detect threats, takes immediate action if a threat is detected, and sends this information to Stellar Cyber.

Stellar Cyber ingests, normalizes, and analyzes ESET data and all other collected data to identify potential threats and prioritize cases.

As security analysts complete incident investigations in Stellar Cyber, response actions are sent to ESET for further action.

ESET AND STELLAR CYBER SOLUTION BENEFITS

- Endpoint protection integrated with AI-driven SecOps means security analysts spend less time firefighting and more time proactively securing the environment.
- The real-time sharing of data limits attacker dwell time.
- Intelligent automation in the joint solution boosts the productivity and efficiency of security teams.

TAKE THE FIRST STEP TODAY

Every security team should be able to deliver continuous, consistent security regardless of their skills or experience. With Stellar Cyber Open XDR and ESET, you can provide consistent security outcomes, giving your security team the time they need to secure your environment effectively. Visit www.stellarcyber.ai or www.eset.com/us today to start your journey.
