

MSP PROGRAM

MSP Tailored Tools

PLACING YOU AT THE CENTER

When you become our MSP partner, the entire ESET ecosystem is designed to work for you. Our MSP-optimized solutions are easy to use, minimize your daily operations, and let you provide top-rated security to help build your customers' trust.

Progress. Protected.

Placing you at the center

INTEGRATION

Use our dedicated plugins for major RMMs or utilize our powerful API

FLEXIBILITY

Upgrade and adjust license volumes any time via the self-service console

AUTOMATION

Efficient security management via cloud-based multitenant console

PROFIT

Earn more with tier-based volume pricing and daily billing

MODULARITY

Cover all platforms with top-rated protection

TRUST

Win your clients' trust by implementing our award-winning technology

SUPPORT

Rely on our dedicated support in your language

ESET plugs straight into your RMM

Support for major RMMs

If you prefer to use your existing RMM, we've got you covered. Our cooperation covers the leading RMMs, including ConnectWise, Solarwinds, Datto, Kaseya, and others. [Check out our plugin page here.](#)

Direct plugins, no need for intermediary consoles

Our unique Direct Endpoint Management (DEM) plugins work *without the need for an intermediary console*. If you're using our DEMs, your RMM will talk directly to the ESET agent, and vice versa. A wide range of operations, including activation, remote scanning, malware reports and more are supported.

Broad security coverage

With our plugin, you can manage Windows and macOS clients plus ESET security on Windows servers (even encryption is included). In case your RMM is not directly supported, use [the eRMM script](#) in ESET endpoint products to integrate your platform straight away!

Dedicated plugin dev team

We take MSP plugins seriously, and have a dedicated development team. We are constantly working on adding new plugins, products and features.

Get the most of your existing monitoring and management tool

The ESET MSP Administrator portal has a *powerful* and well *documented* API, which provides you with unlimited options of integrations, management and automation.

MODULARITY

The tailored solution that you can easily mix and match

Get the level of protection that's right for your customers by selecting the ESET PROTECT tier that matches your needs and theirs. A single license covers the security of all major operating systems and devices.

The tiers are *easily scalable*, allowing you to add or remove seats every day at no extra cost.

	Console	Modern Endpoint Protection	Server Security	Advanced Threat Defense	Full Disk Encryption	Mail Security	Cloud Application Protection	Vulnerability & Patch Management	Detection and Response	Authentication	Endpoint Encryption	Sharepoint Security
PROTECT ENTRY	●	●	●							○	○	○
