

SECURITY SOLUTIONS FOR EDUCATION

Spend more time supporting your faculty, staff, students and education initiatives—and less time worrying about security issues. ESET® helps you navigate the complex security landscape and minimize risk as you digitize classrooms, roll out Common Core State Standards and keep legacy equipment running smoothly. Our solutions address business continuity and compliance issues while keeping budget constraints in mind.

ESET understands education customers

While requirements vary greatly between K-12 and higher education settings, both face ongoing challenges in protecting networks, endpoints and users.

- ✓ Work with tight budgets that force IT teams to extend the life of endpoints and servers and reduce spending on software and upgrades.
- ✓ Manage a broad range of devices, from legacy equipment and multiple operating systems to the latest smartphones and tablets.
- ✓ Protect sensitive data including employee and student records, medical information, Social Security numbers and payment accounts.
- ✓ Serve a diverse user base of varying ages, technical knowledge and needs.
- ✓ Meet complex compliance, auditing and reporting requirements driven by CIPA, HIPAA, PCI and more.

Superior protection and speed

As pioneers in the cyber security arena, ESET developed heuristic detection, an innovation that anticipates new viruses before they can do harm to your system.

- ✓ Heuristic detection uses formulas based on known viruses and extrapolated virus behaviors to predict and stop new viruses.
- ✓ Detects known viruses as well as emerging threats for comprehensive protection.
- ✓ Speeds up scans by whitelisting safe files based on a file reputation database.
- ✓ Maintains a light footprint that doesn't slow down operations, even on older operating systems and hardware.

Exceptional value and versatility

ESET offers our education customers no-charge central management for multiple users and devices and ongoing technical support. By extending the useful life of your hardware, ESET helps you save substantial money.

- ✓ ESET can replace outdated and underperforming antivirus programs from other vendors quickly and at low cost.
- ✓ Pre-configured bundles, from entry-level to complete coverage, offer additional cost savings over individual items.
- ✓ Install and manage systems from gateway to endpoint, from legacy hardware to the latest tablets, all from a single console.

SECURITY SOLUTIONS

FOR EDUCATION

Education support

ESET provides you with the tools and technologies to help keep your students and faculty safe.

- ✓ **Single console** lets you easily customize and maintain logs and run reports as needed.
- ✓ **Antivirus/antimalware** proactively protects assets from viruses and malware.
- ✓ **Web control** supports the blocking of websites at the endpoint level and reduces the ability to bypass web blocking.
- ✓ **Two-factor authentication** prevents unauthorized access to student records or any other confidential information.
- ✓ **Encryption** protects the loss of confidential data and allows the ability to remotely wipe devices.
- ✓ **Software firewall** protects computers by analyzing network communication.
- ✓ **Device control** prevents students and faculty from attaching any third party devices such as smartphones to a school computer.
- ✓ **Cybersecurity training** for faculty and staff, conducted on-site or remotely.

ESET[®] BUSINESS SOLUTIONS

Bundled solutions give you the flexibility to implement an ESET security solution to fit your needs now, and to add, renew and upgrade as your technology needs evolve.

ESET Endpoint Protection Standard

Keep your network clean and protect your endpoints (computers, smartphones, tablets and file servers) against emerging threats and data theft with security that is easily manageable from a single console.

ESET Endpoint Protection Advanced

Build on the security of Endpoint Protection Standard by adding a firewall, antispam and URL filtering—implementing additional layers of protection for your school's network and authorized mobile devices.

ESET Secure Business

Protect all computers, laptops, mobile devices and file servers—and prevent email-borne malware and phishing messages from reaching them—with Mail Security that hardens your network with an extra line of defense.

ESET Secure Enterprise

Choose this option if you operate your own Internet gateway server. Safeguard your HTTP/FTP communications and block malware at your network perimeter while maximally protecting endpoints and servers.
